Lyra Cloud-Based Solution

What is Lyra?

Lyra is a fully digital, intelligent, cloud-based solution, designed to provide individually tailored care and support in any setting. The Lyra platform is unique in its kind and creates a secure, flexible and quickly installed solution, with no need for any hard wiring. Integrated wireless press and play telecare and telehealth sensors ensure we can deliver bespoke solutions to meet the changing needs of users. Lyra is data driven, enabling our partners to be more proactive and efficient in delivering care, promoting independence and improving quality of life.

Who is Lyra for?

Lyra is an integrated digital solution that can be used in any care environment, including nursing and care homes, assisted living and to support someone living in their own home. Everon builds bespoke, digital, wireless solutions that can be adapted to the individual needs of each setting and each user.

Key Benefits

For the user:

- **Bespoke** - wide range of press and play accessories to perfectly suit individual needs

- **Rapid** - easy to use call buttons for quick assitance and support

- **Discreet** - seamlessly blends in the home for unobtrusive care and support

- **Dependable** - 24/7 monitoring for round the clock reassurance. Fully compatible with all the mainstream alarm receiving centre platforms

Key Features

For carers, commissioners and health and care staff:

- **Responsive** - manage and respond to alerts using the Everon Portal on an Android smart phone

- **Cloud-based** - quick and easy installation with no hard wiring

- **Future proofed** - fully compliant with the BT analogue to digital switchover

- **Manageable** - automatic system updates with no need for maintenance contracts

- **User friendly** - enabling teams to work more efficiently

- **Data driven** - intelligent monitoring identifies changes quickly, preventing decline and improving quality of life

- **Integrated** - Lyra utilises open APIs to support the delivery of a holistic model of care
